

Piccoli Charge & Drive

The all-in-one software solution for Charge Point Operators (CPO) and e-Mobility Service Providers (EMP)

Key Capabilities

Infrastructure Management

- Manage EV charging stations, chargers, and connectors
- Monitor sessions, stations, and chargers
- Smart energy management with load balancing
- Troubleshoot problems
- Apply remote commands (reboot, firmware update, etc.)
- Dashboard with real-time data and Google maps
- Hardware flexibility through Open Charge Point Protocol – OCPP

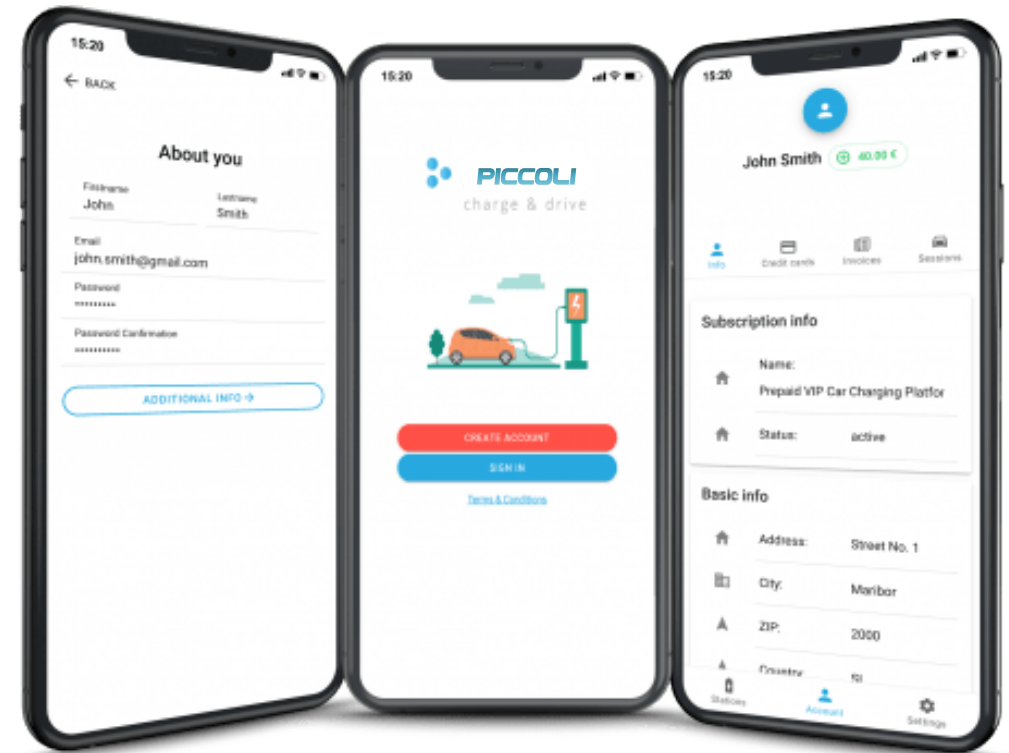

Customer Management

- Find and keep track of your customers via an intuitive user interface
- Monetary and non-monetary balances of services
- Billing and account receivable (AR) history
- Upsell and cross-sell services
- Set notification thresholds
- Manage payments and write off items

Customer Web & Mobile App

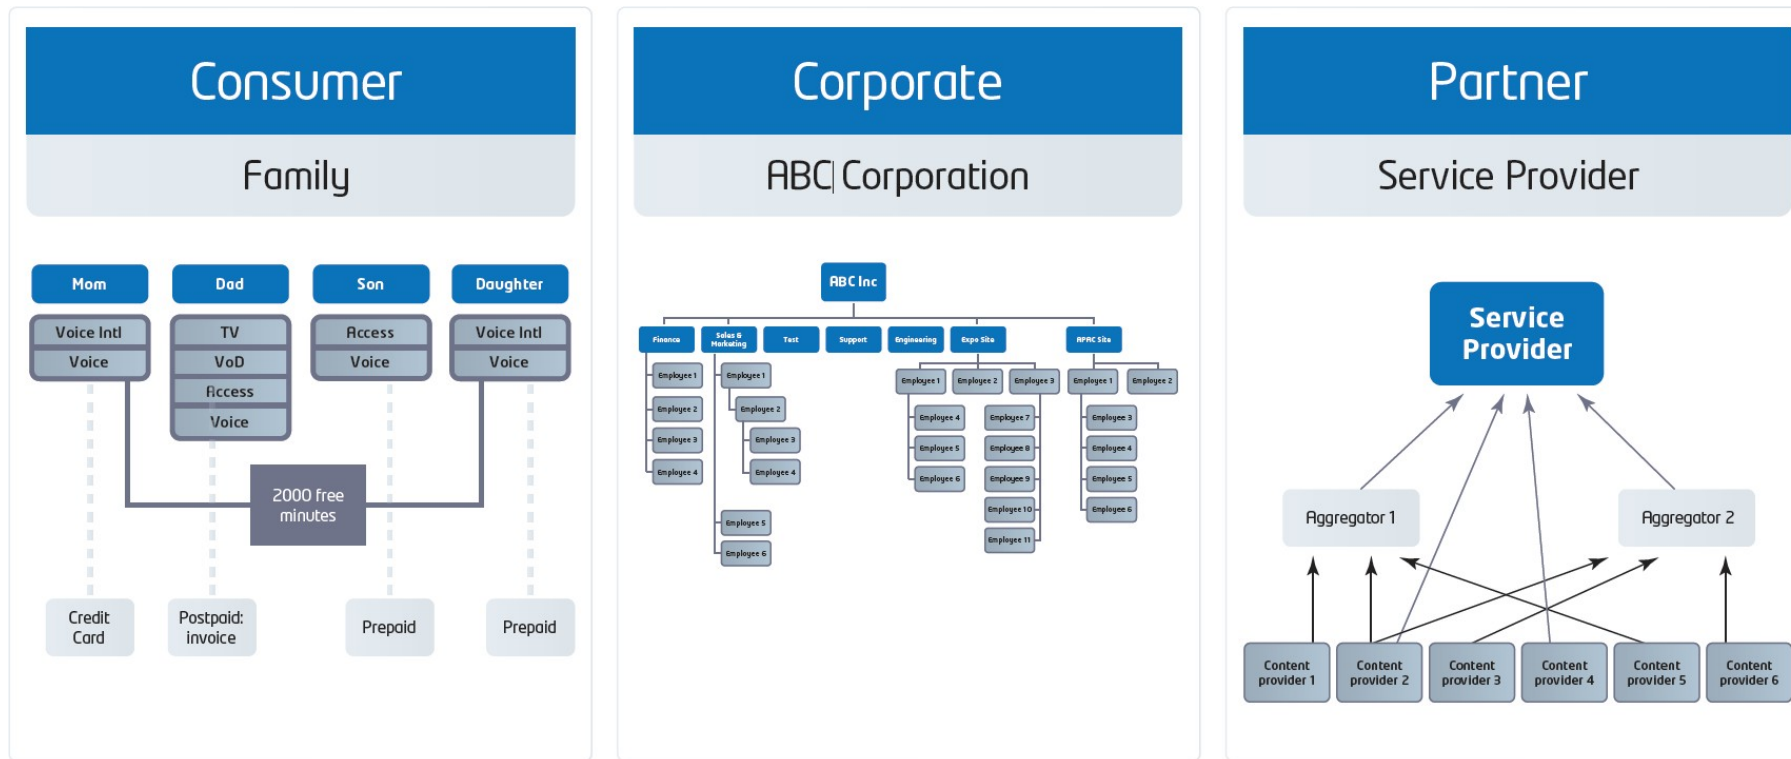

- Branded mobile apps with the local language, and local currency
- Charger map, availability & reservation
- Find and navigate to an EV charger
- Managing various payment options
- Issue submission
- Account balance
- Charging session management
- Charging history information

Monetization

- Personalized offers, promotions, and advanced discounts
- Set up complex price plans and tariff models
- Flexible tariffs – per KW/h, per minute, etc.
- Family & business plans
- Multiple currencies support
- Integration with multiple payment gateways
- Different payment options – Credit & Debit cards, Vouchers, etc
- Prepaid, postpaid & pay-per-charge business model
- Real-time charging with notifications
- Billing & Invoicing

Enables Diverse Business Models

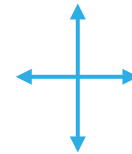

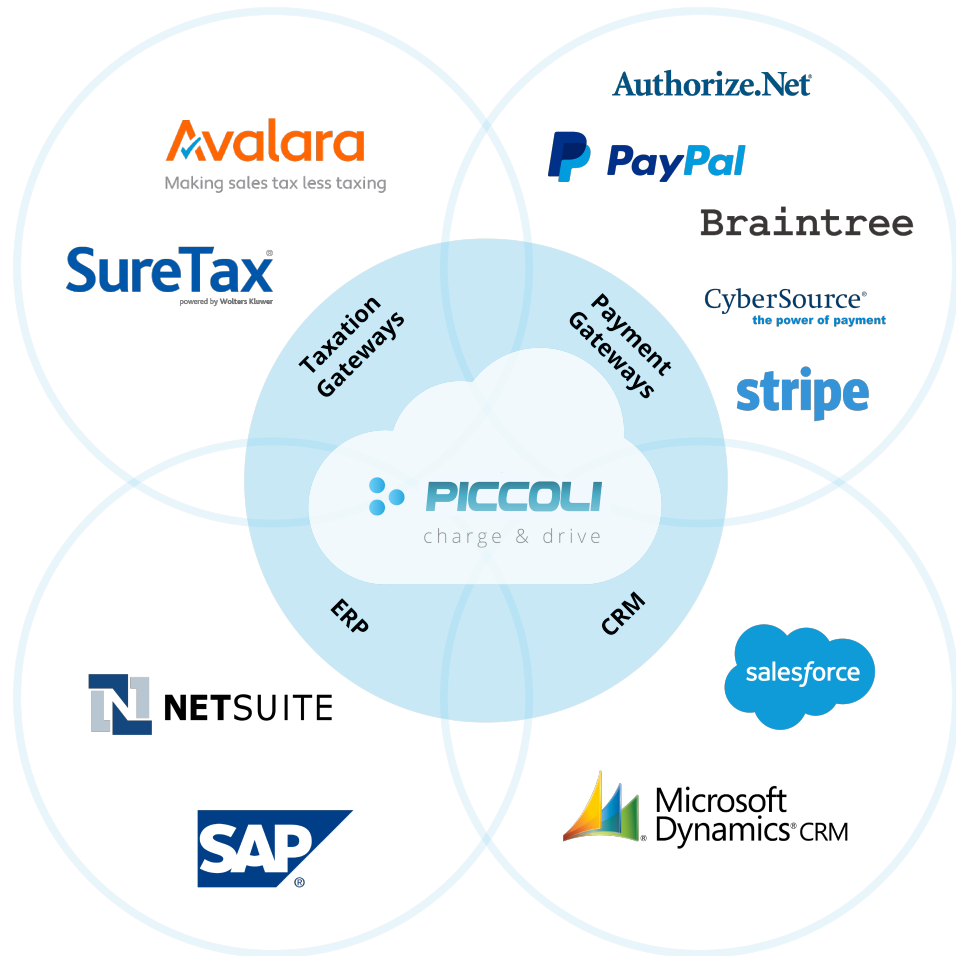

Any Service to any Customer Type, with any Payment Option in any Group

Reports & Real-time Analytics

- Get 360° business visibility with real-time analytics, reports, and insight-driven dashboards.
- Users, Plans, Usage, Revenue, Transactions, Sessions, Stations, Chargers, etc.

Ecosystem

Easy integration between 3rd party applications

OCPP, Protocols - Open Charge Alliance

Benefits You Will Gain

Reduce Time to Market

Faster to market with new products & services or improved existing offerings.

Operational Excellence

Ensure EV charger stability and availability and reduce total cost of ownership with smart charging management.

Business Superiority

Monetize your EV charging network, support innovative business models, and improve customer experience.

Web-based Management

Manage all aspects of your EV charging infrastructure, customer & partner relations, charging, billing and payments, view real-time analytics, and reports.

Awesome Customer-Centric UX

The white-label customer mobile app for Android & iOS is intuitive and well-designed. Being the front-end of the service, it truly delivers an awesome user experience.

Technological Leadership

Certified for Charge Point Protocols (OCPP 1.6, OCPP 2.0) and compliant with ISO 15118, enabling vehicle-to-grid (V2G) communications, allowing for virtually any modern charging station.

How to start

- Configure user web & mobile app
- Integration with EV chargers via OCPP
- Integration with the payment gateway
- Integration with the 3th party apps
- Configure EV chargers
- Configure Monetization (pricing, invoicing, etc.)

Thank You For Your Time!
