

KEY BENEFITS

- **Business Superiority:**
Monetize your EV charging network, support innovative business models, and improve customer experience.
- **Operational Excellence:**
Ensure EV charger stability and availability and reduce total cost of ownership with smart charging management.
- **Reduce Time to Market:**
Faster to market with new products & services or improved existing offerings.
- **Web-based Management:**
Manage all aspects of your EV charging infrastructure, customer & partner relations, charging, billing and payments, view real-time analytics, and reports.
- **Reduced indirect costs:**
Curtailed downtime and time-to-market delays
- **Awesome Customer-Centric UX:**
The white-label customer mobile app for Android & iOS is intuitive and well-designed. Being the front-end of the service, it truly delivers an awesome user experience.
- **Technological Leadership:**
Certified for Charge Point Protocols (OCPP 1.6, OCPP 2.01) and compliant with ISO 15118, enabling vehicle-to-grid (V2G) communications, allowing for virtually any modern charging station.

We make it easy to use electric vehicles, efficiently operate and grow charging networks, and move towards the cleaner world.

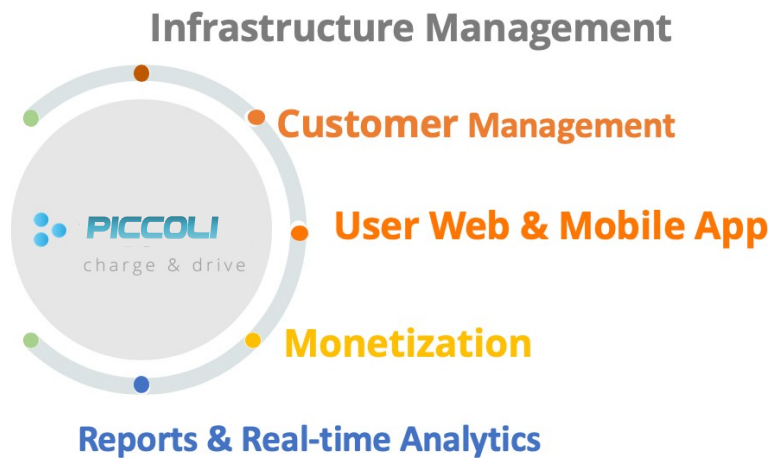

Piccoli Charge & Drive is a pay-as-you-go software solution for Charge Point Operators (CPO) and e-Mobility Service Providers (EMP).

KEY FEATURES

- OCPP hardware compliance
- Smart charging with load balancing
- Personalized offers, promotions, and discounts
- Dynamic tariffs
- Enables prepaid, postpaid or pay-as-you-go business model
- Balance notifications in real-time
- REST APIs for easy integration

Features

Piccoli Charge & Drive enables infrastructure management, customer management, user web and mobile app, monetization, reports, and real-time analytics.

Infrastructure Management

- Manage EV charging stations, chargers, and connectors
- Monitor sessions, stations, and chargers
